EDUCATION

Sheridan College

Honours Bachelor of Computer Science (Mobile Computing)

Oakville, ON

Sept. 2022 – Dec 2025

Sheridan College

Computer Programming Diploma

Oakville, ON

Jan. 2019 – Apr. 2020

EXPERIENCE

Student Research Assistant

Sheridan College

Oct. 2025 – Dec. 2025

Oakville, ON

- Developed a native-integrated healthcare app using Next.js and Supabase within a 7-member Agile team
- Led the complete UI redesign with a fully responsive layout, improving UI/UX consistency, accessibility (WCAG), and cross-device compatibility.
- Presented technical findings to stakeholders during weekly Scrum sprint reviews, bridging communication gaps.

Software Developer (Internship)

SIRT Centre

May 2025 – Sept. 2025

Toronto, ON

- Collaborated on multiple industry-partner projects, focusing on Unreal Engine for game development and animation workflows.
- Designed and implemented a machine learning pipeline converting text to Gloss for sign language applications, improving accessibility-focused research projects.
- Integrated generative ML models and 3D animation workflows (BVH) into Unity and Unreal for cross-platform development.

Full Stack Developer (Internship)

Sheridan College

Jan. 2025 – Apr. 2025

Oakville, ON

- Built interactive web games using HTML, CSS, JavaScript, and Three.js to create dynamic, engaging user experiences.
- Managed and mentored a 10-member development team, improving collaboration, task accountability, and on-time delivery of project milestones.

iOS App Development Mentor

Career Education Council

Oct 2023 – Apr. 2025

Guelph, ON

- Mentored students in Swift iOS app development through weekly technical sessions.
- Tracked progress and provided feedback to improve coding practices and application quality.

Junior Programmer (Internship)

SIRT Centre

May 2024 – Sept. 2024

Toronto, ON

- Conducted research and testing on new software tools and plugins to improve workflow efficiency in the Unity project using a node-based approach
- Assisted in generating animations by initializing pipeline using different generative machine learning models
- Implemented features for a VR application using Unity in a collaborative team environment

PROJECTS

SecureRental App | *SwiftUI, Firebase Auth, Firestore, OpenAI*

Dec. 2025

- Collaborated with a two-member team to design and develop a full-stack rental marketplace iOS application.
- Implemented Firebase Authentication and Firestore to enable secure user login and real-time data storage.
- Integrated Persona external API for identity and ID verification, adding an additional security layer to ensure platform trust and user safety.
- Integrated an OpenAI-powered chatbot to provide in-app assistance and educational resources.

TECHNICAL SKILLS

Languages: C, C++, C#, Java, Python, Swift, Kotlin, PHP, Dart, JavaScript, TypeScript

Frameworks: React, React Native, Angular, Node.js, Express.js, Next.js, Spring Boot, Flutter, ASP.NET, GraphQL

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Cloud/DevOps: AWS, Azure, Docker, Linux, Firebase, CI/CD pipelines
