TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C#, Swift, Kotlin, HTML/CSS, PHP, C
Frameworks & API: Spring Boot, ASP.NET, React, Angular, Next.js, Node.js, FastAPI, REST APIs, GraphQL
AI & Automation: Machine Learning pipelines (Python), OpenAI API, GitHub Copilot, PowerShell/shell scripting
Cloud/DevOps: AWS (Lambda, S3, API Gateway, CloudFormation), Microsoft Azure, Docker, Kubernetes, CI/CD
Databases: MS SQL Server, PostgreSQL, MongoDB, SQLite, DynamoDB, ETL/ELT pipeline design
Tools & Process: Git, Jira, JWT/OAuth 2.0, Agile/Scrum, SDLC, ITSM concepts

EXPERIENCE

EMR Implementation Specialist

Apr 2026 – Present

HealthTech Consultants

Halifax, NS

- Collaborated with Nova Scotia Health on the OPOR initiative, supporting clinical staff adoption of Oracle Cerner EHR across multiple healthcare sites
- Diagnosed and escalated workflow and technical issues across clinical systems, applying structured troubleshooting in a regulated, enterprise environment

Software Developer

Oct 2025 – Dec 2025

Sheridan College

Oakville, ON

- Led frontend development on a healthcare research app (Next.js/TypeScript + Supabase) in partnership with UHN, delivering production-ready features through Agile sprints and stakeholder presentations
- Owned end-to-end UI redesign improving WCAG accessibility compliance across mobile, tablet, and desktop; reduced UI inconsistency issues by 40%
- Leveraged AI-assisted development tools (GitHub Copilot, Claude) to accelerate velocity and improve code quality

Software Developer Intern

May 2024 – Sept 2024 | May 2025 – Sept 2025

SIRT Centre

Toronto, ON

- Designed and implemented a Python-based ML pipeline converting text to sign language gloss, contributing to an accessibility-focused communication system
- Automated test scripts for pose data pipelines using Python and Git; reduced defect detection time by 20%
- Followed CI/CD best practices; participated in code reviews, maintained production-grade Git workflows, and collaborated on design, implementation, and QA within an Agile/Scrum environment

Full Stack Developer Intern

Jan 2025 – Apr 2025

Sheridan College

Oakville, ON

- Designed and implemented modular, reusable components using HTML, CSS, and JavaScript for web applications
- Managed and mentored a 10-member team, improving task accountability and on-time milestone delivery

EDUCATION

Sheridan College

Oakville, ON

Honours Bachelor of Computer Science (Mobile Computing)

Sept 2022 – Dec 2025

Relevant Coursework: Data Structures & Algorithms, Cloud Infrastructure, Database Modelling, Web App Design, Software Engineering, Artificial Intelligence, Business Intelligence & Data Mining

PROJECTS

Laptop Rentals | *AWS, Python, HTML, CSS, Javascript* | [GitHub](#)

Jan 2026

- Designed and deployed a scalable, multi-AZ AWS cloud solution using VPC, EC2, S3, API Gateway, Lambda, and DynamoDB; included cost analysis and architectural planning
- Automated serverless Lambda functions in Python for efficient data retrieval and modification

InstaCloneBackend | *ASP.NET, C#, JavaScript, HTML, CSS, SQLite* | [GitHub](#)

Dec 2025

- Built a RESTful API backend in C# and ASP.NET with endpoints for image posting, tagging, user management, and search/filtering
- Implemented SQLite database with endpoints for popular tags, random images, and user queries
